WORK EXPERIENCE

Internship

Oil and Natural Gas Corporation (ONGC)

📅 May – June 2016 📍 New Delhi, India

Built an application to generate ABAP List Viewer (ALV) Report by retrieving data from multiple tables using F4 help object to select records. The application developed had the flexibility to allow retrieving data from any number of linked tables as selected by the user before executing the application.

- Technology used- ABAP

Internship

HCL Infotech Limited

📅 June – July 2015 📍 Noida, India

Developed a web application to make searching for nearby hospitals, fire stations, restaurants, parks, metro stations and police stations easy. The user enters the district or city name. A search provides the top 20 nearest results with Address, Local Phone Number and International Phone Number for the selected category.

- Technology used- HTML, CSS, Python, Python Google Places, Bootstrap and Django Framework
- Link- <https://find-my-perfect-place.herokuapp.com/>

PROJECTS

Link to the source code of the projects: [GitHub](#)

SafeBox
